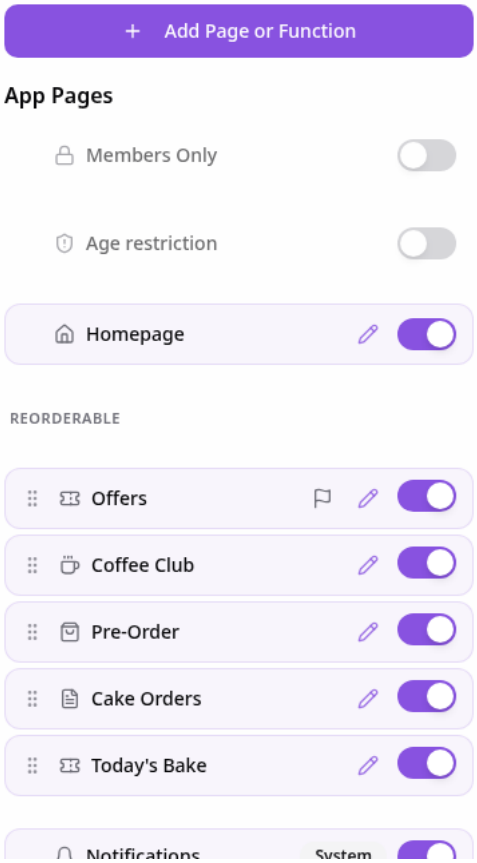
Create a coupon offer

1. Open Pages

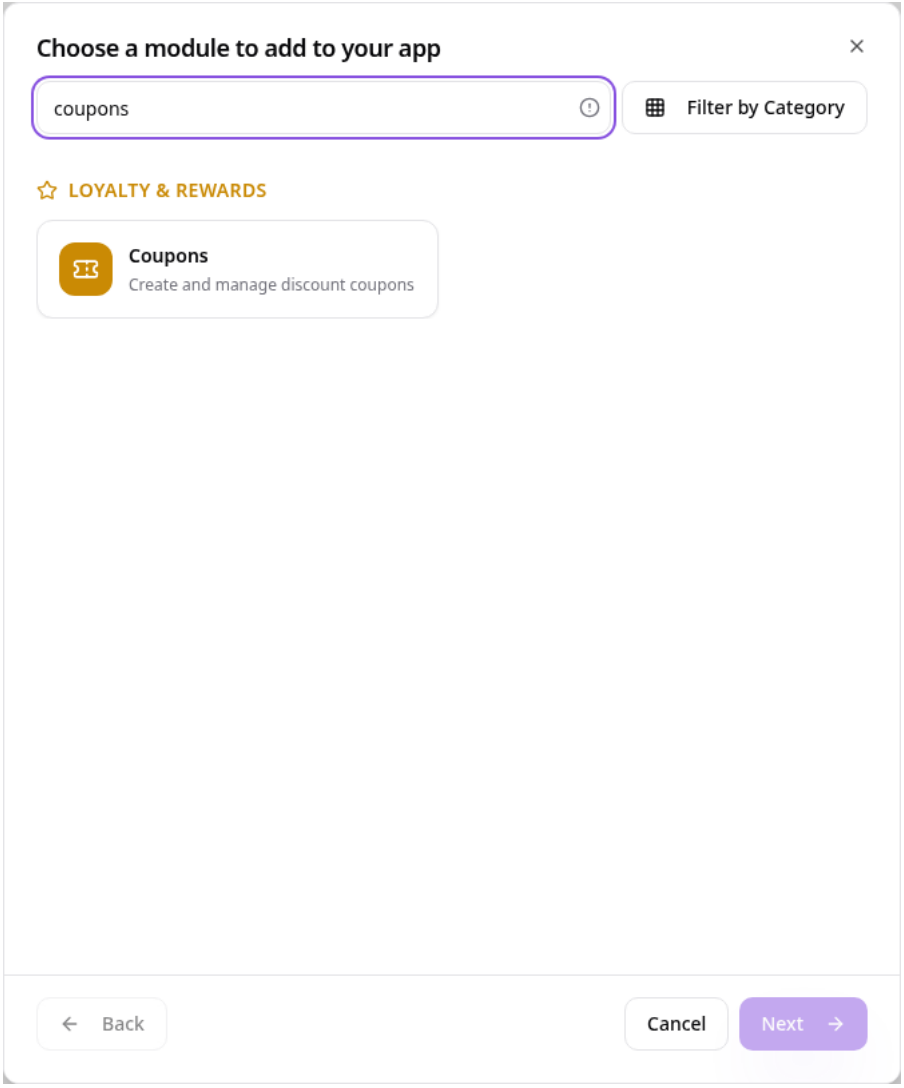
In your app editor, open Pages and tap Add Page or Function.



Create a coupon offer

2. Choose Coupons

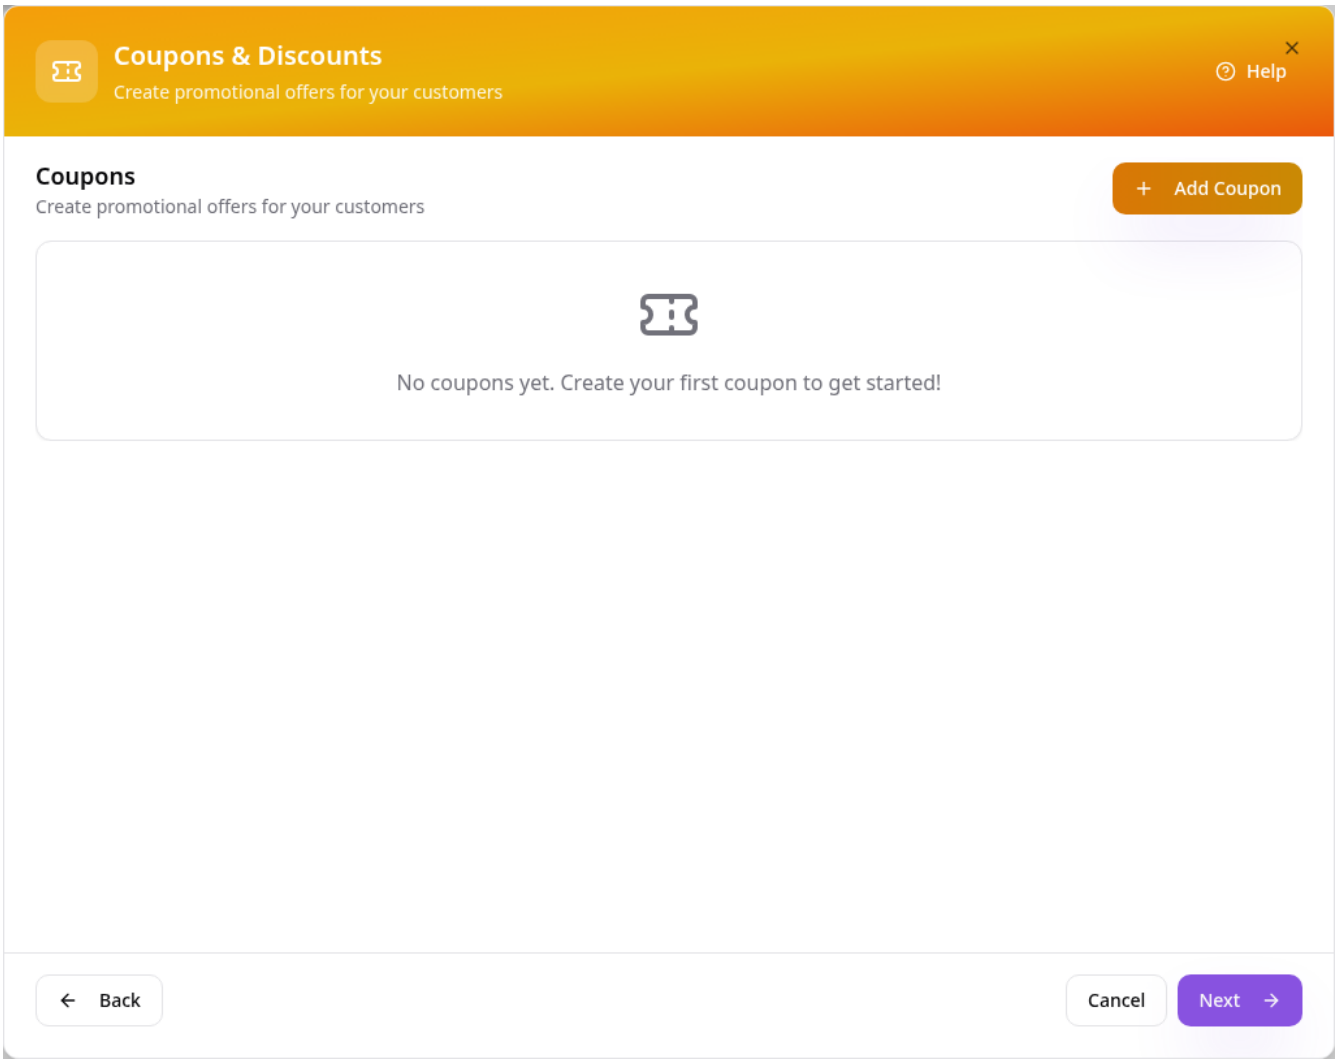
Search “coupons” and tap Coupons.



Create a coupon offer

3. Add your first coupon

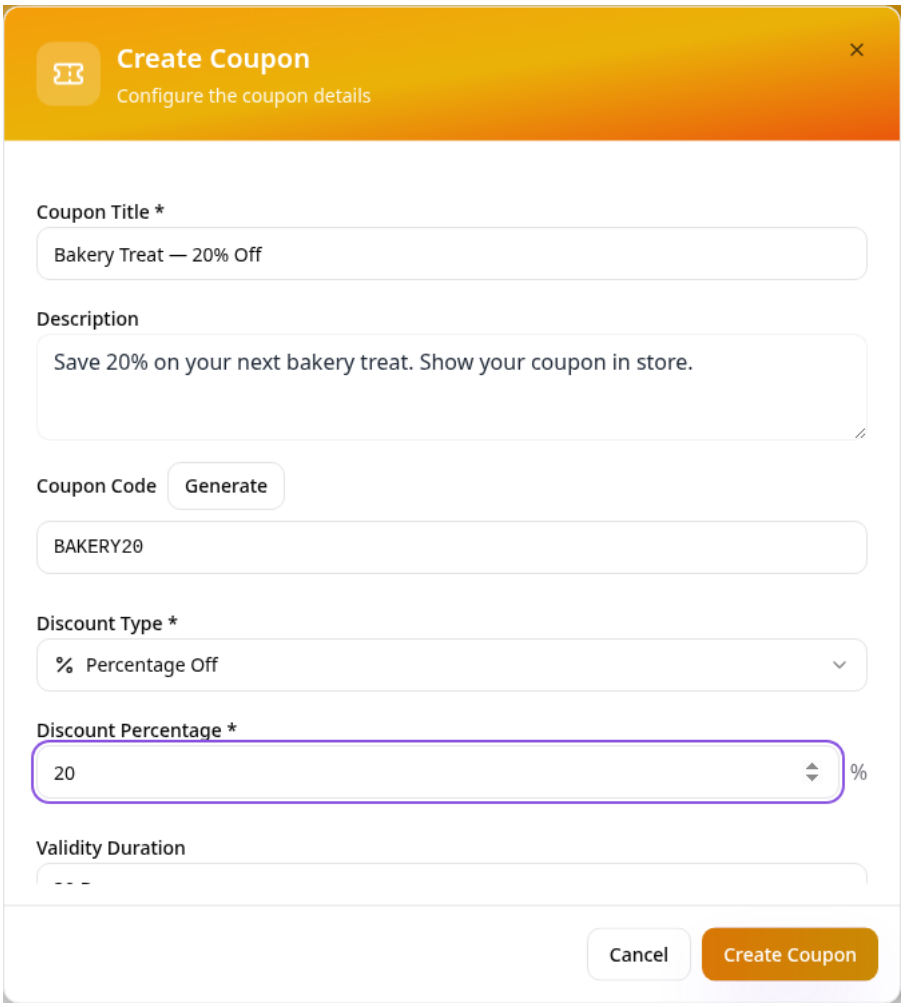
Tap Add Coupon.



Create a coupon offer

4. Describe the offer

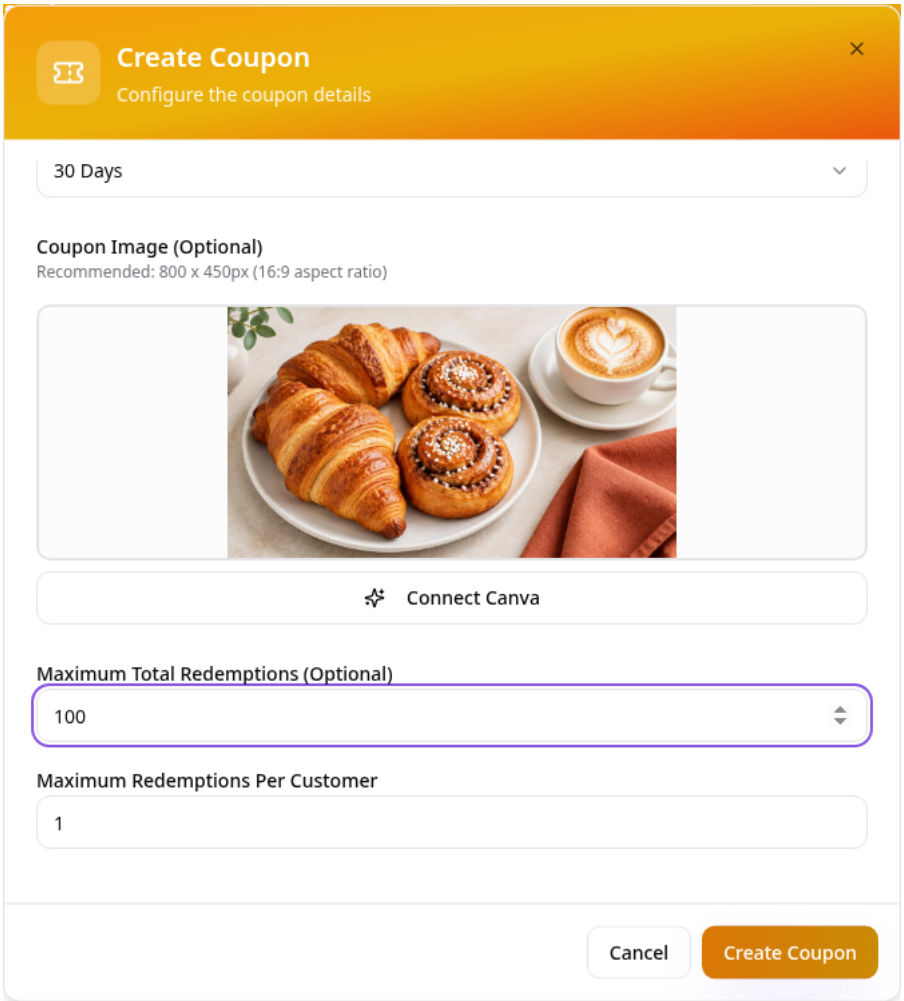
Add a title, description and code, then choose the discount type and value.



Create a coupon offer

5. Set validity and limits

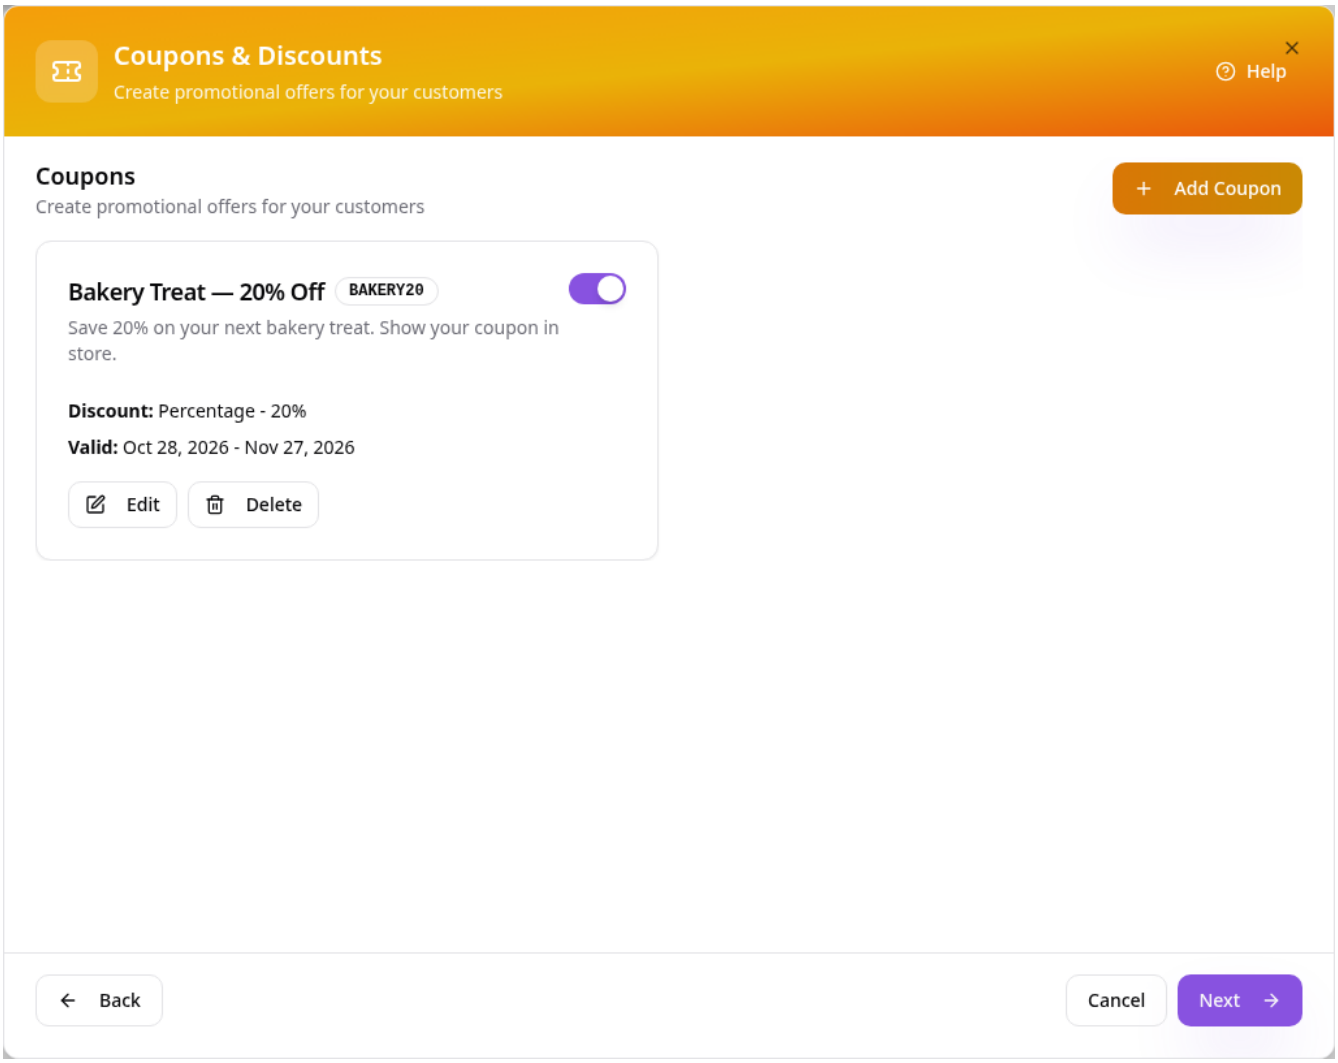
Choose how long it lasts, add an optional image and set redemption limits. Tap Create Coupon.



Create a coupon offer

6. Check your saved coupon

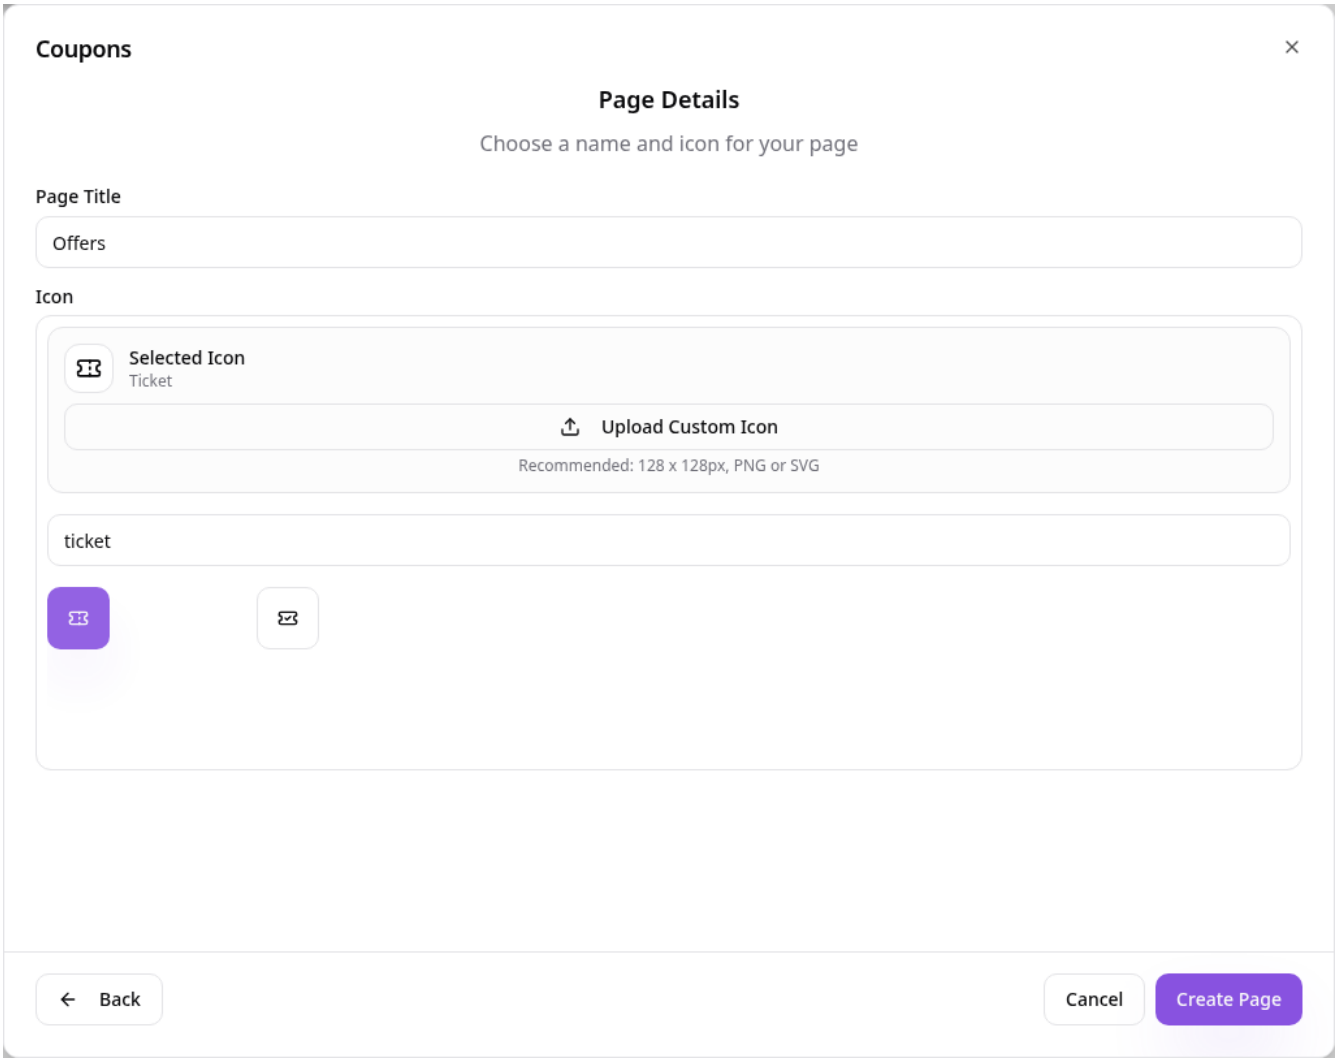
Keep the offer switched on. Tap Edit for changes, or Next to continue.



Create a coupon offer

7. Name the page

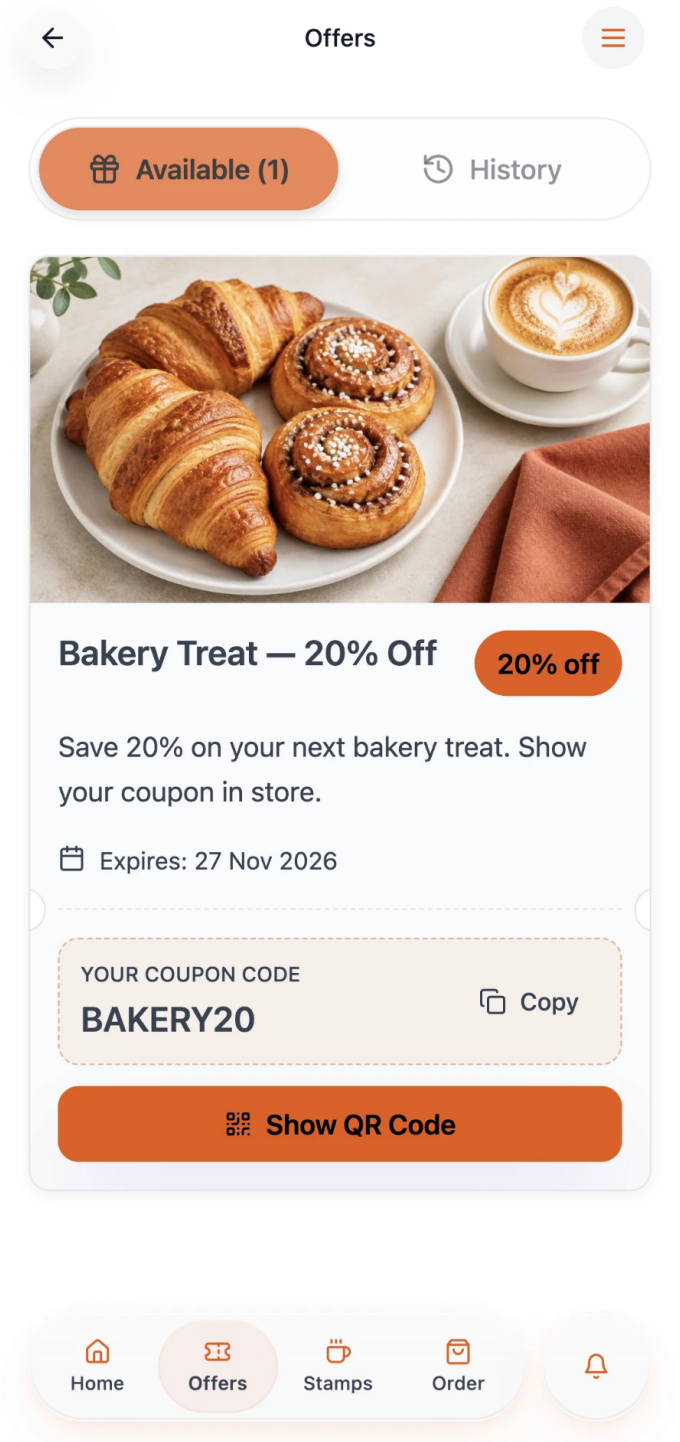
Use a short name such as Offers, choose an icon and tap Create Page.



Create a coupon offer

8. See it in your app

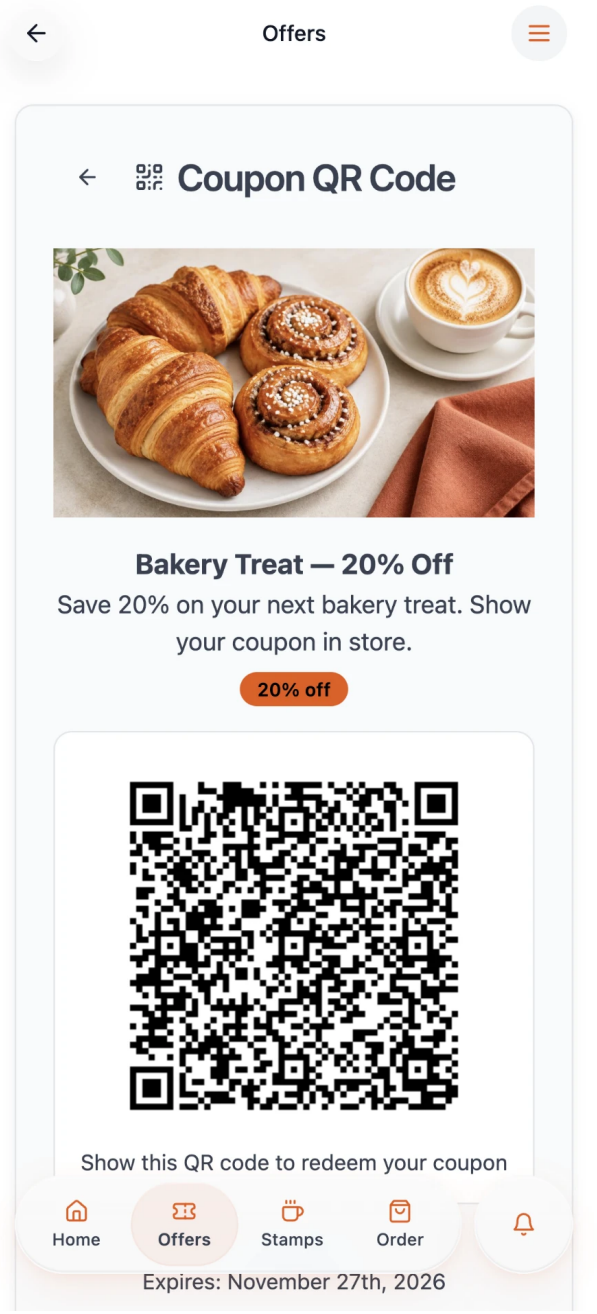
Members see your offer with its code, ready to copy or redeem in store.



Create a coupon offer

9. Redeem with a QR code

Tapping Show QR Code gives customers a code your team can scan to redeem the offer.



To change an offer later, open its page in Pages, choose Edit Page Content and tap Edit. Coupon redemption activity is in Data Manager.
