

Create a form

1. Open Pages

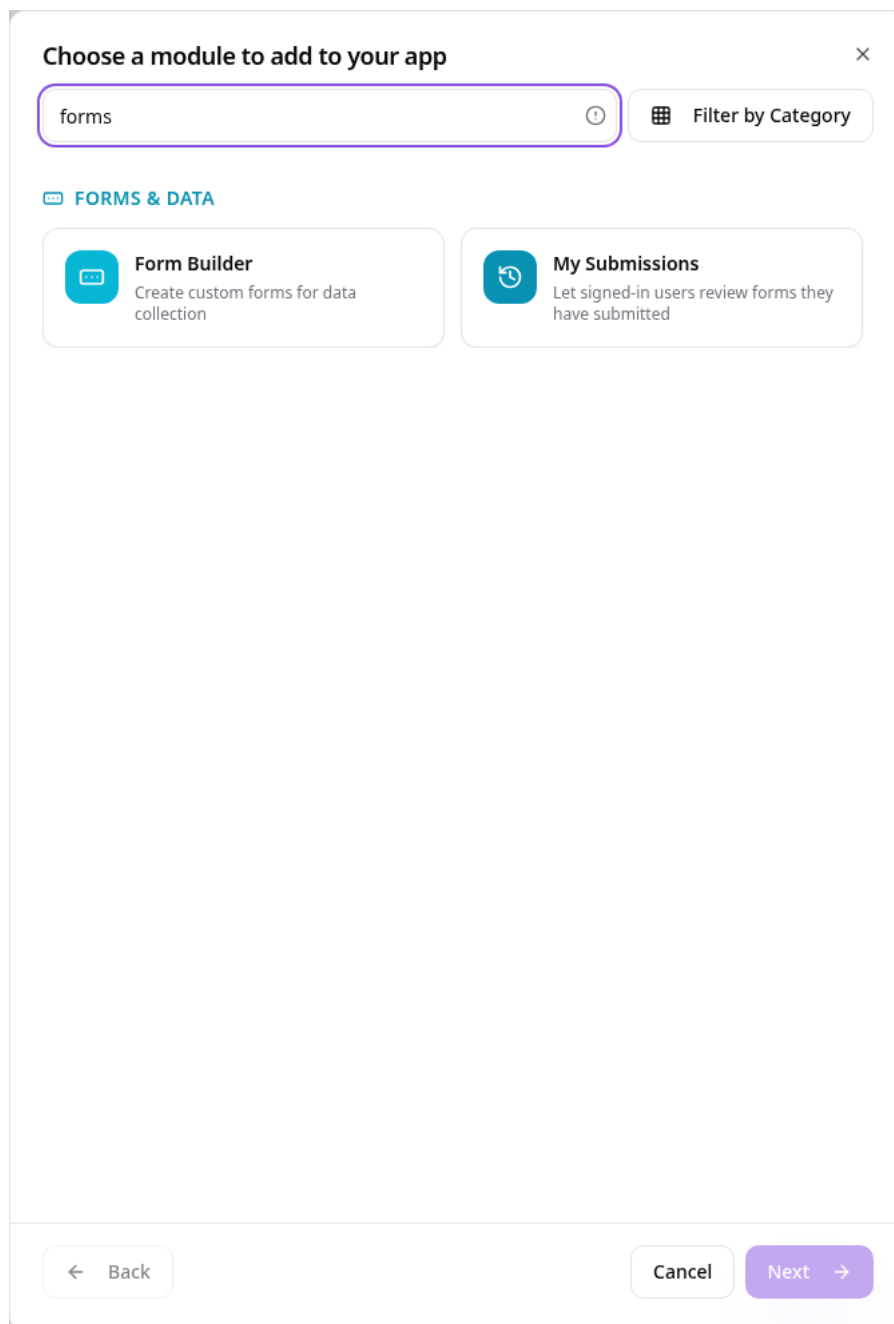

In your app editor, open Pages and tap Add Page or Function.

Create a form

2. Choose Form Builder

Search “forms” and tap Form Builder.

Create a form

3. Choose how to start

Tap Start from scratch, or choose a template if you prefer a ready-made starting point.

4. Name your form

Enter a form name and optional description, then tap Add field to add your first question.

The screenshot shows the 'Form Builder' interface with a blue header bar. The header contains a 'Form Builder' title with a subtitle 'Design custom forms for data collection', a 'Help' icon, and a close button. Below the header is a navigation bar with 'Build' (active), 'Settings', and 'Confirmation' tabs, and a 'Preview' button. The main form area has two input fields: 'Form name' with the text 'Contact the bakery' and 'Description (optional)' with the text 'Have a question? Send us a message.'. To the right of the description field is a 'Templates' button. Below these fields is a 'Form fields' section showing '0 fields'. The central area of the form fields section contains a large blue plus sign in a circle, the text 'Add your first question', a subtext 'Start with a name, email address or any question you need.', and a blue button labeled '+ Add field'. At the bottom of the form, there is a message 'Add at least one question to save.' and two buttons: 'Cancel' and 'Save changes'.

5. Pick a question type

Choose Short answer for a name; search or scroll to find other question types.

The screenshot displays the 'Form Builder' interface with a blue header bar containing the title 'Form Builder' and the subtitle 'Design custom forms for data collection'. On the right of the header is a 'Help' button. Below the header, there are three tabs: 'Build' (active), 'Settings', and 'Confirmation'. A 'Preview' button is located on the far right. The main form area shows a 'Form name' field with the text 'Contact the bakery'. Below this is a 'Form fields' section with a '0 fields' indicator. A modal window titled 'Add field' is open in the center, featuring a search bar 'Search field types...' and a list of field types: 'Short answer' (Single line text input), 'Long answer' (Multi-line text area), 'Email' (Email address with validation), 'Phone' (Phone number input), and 'Number' (Numeric value input). A '+ Add field' button is at the bottom of the modal. At the bottom of the form builder, there is a message 'Add at least one question to save.' and two buttons: 'Cancel' and 'Save changes'.

Create a form

6. Edit the question

Enter the question and placeholder on the right, and turn on Required if an answer is needed.

12. See it in your app

Open Contact to see the saved form; test responses in your own app, not in the display-only preview.

The screenshot shows a mobile app interface for a 'Contact' form. At the top, there is a navigation bar with a back arrow on the left, the title 'Contact' in the center, and a menu icon on the right. Below the navigation bar, the text 'Have a question? Send us a message.' is displayed. The form consists of three input fields: 'Your name *' with a placeholder 'Your full name', 'Email address *' with a placeholder 'you@example.com', and 'Your message *' with a placeholder 'How can we help?'. Below the input fields is a large orange button labeled 'Send message'. At the bottom of the screen is a tab bar with five icons: a house icon for 'Home', an envelope icon for 'Contact' (which is highlighted), a calendar icon for 'Events', a heart icon for 'Donate', and a bell icon for notifications.

Create a form

13. Edit this form later

In Pages, tap Contact and choose Edit Page Content to open this form directly; save when finished.

The screenshot displays the AppBuild.diy Form Builder interface. At the top, a blue header bar contains the 'Form Builder' title and a subtitle 'Design custom forms for data collection'. Below the header, a navigation bar includes 'Build', 'Settings', and 'Confirmation' tabs, along with a 'Preview' button. The main workspace is divided into two sections. On the left, the 'Form fields' section shows a list of three fields: 'Your name' (Short answer, Required), 'Email address' (Email, Required), and 'Your message' (Long answer, Required). Each field has a drag handle, a 'Required' status, and a 'Short answer' or 'Long answer' type. On the right, the 'Field settings' panel is open for the 'Your name' field. It includes sections for 'Basic Info' (Question: 'Your name', Field type: 'Short answer'), 'Required' (toggle on), 'Placeholder & Help' (Placeholder Text: 'Your full name', Help Text: 'Add helpful instructions for users'), and 'Validation Rules'. At the bottom, a status bar indicates 'No unsaved changes' and provides 'Cancel' and 'Save changes' buttons.

Responses are available in Data Manager under Forms. Select your app and form to review submissions. Leave the notification email blank if you do not want email alerts.
